PROFESSIONAL SUMMARY

React Native Engineer with 2+ years of experience owning the mobile app of a live fintech product with 200,000+ active users across iOS, Android and Huawei AppGallery. Experienced in custom Swift native modules (Apple Pay), biometric security, CI/CD with Fastlane and GitHub Actions, and monthly multi-store releases. Also architected a full-stack enterprise web system and guided junior developers. Star Rookie (2025) and Star Performer (2026) at Cogniwide.

TECHNICAL SKILLS

Mobile: React Native CLI, TypeScript, JavaScript (ES6+), React Navigation, Redux Toolkit, Context API, Zustand, Reanimated, Hermes, Swift (native modules), New Architecture (Fabric, TurboModules), MMKV

Integrations: Apple Pay, KNET payment gateway, Firebase (Push Notifications, Crashlytics), REST APIs, Maps, PDF generation, media upload

Security: AES-256 Encryption, Biometric Auth (Face ID / Fingerprint), Jailbreak Detection, Secure Key Storage

Release and Tools: Fastlane, GitHub Actions, CI/CD, Xcode, Android Studio, App Store, Google Play, Huawei AppGallery, Git, Postman, Figma

Web and Backend: React, Vite, Tailwind CSS, Node.js, Express, Python (FastAPI), SQL

Practices: Agile, Scrum, architecture design, mentoring, requirements gathering

WORK EXPERIENCE

Cogniwide Technologies, Madurai

Software Engineer | Dec 2024 - Sep 2026

- Owned the mobile app for a live money exchange product with 200K+ users on iOS, Android and Huawei AppGallery.
- Integrated Apple Pay (custom Swift module), KNET gateway, biometric auth (Face ID/Fingerprint), Firebase push notifications, PDF generation, media upload and maps.
- Implemented AES-256 encryption, jailbreak detection and secure key storage; app cleared the client's security review before release.
- Cut app launch time by 30% via Hermes tuning, lazy loading and Reanimated.
- Reviewed Firebase Crashlytics weekly and shipped monthly releases to the App Store, Google Play and Huawei AppGallery via Fastlane and GitHub Actions.
- Architected the frontend (React, Vite, Tailwind CSS) and Python (FastAPI) backend of an enterprise Visa Management System and managed 4 junior developers; UAT completed.
- Designed the architecture for a School Management app (React Native) and guided 2 junior developers.

Associate Software Engineer | Jun 2024 - Nov 2024

- Built the frontend of the money exchange app from Figma designs, including folder structure, navigation and state management (50+ screens).
- Gathered requirements from clients and internal leads and translated them into frontend solutions.

PROJECTS

SpendWise - AI Expense Tracker (Personal Project, 2025) | React Native, Gemini API, MMKV, Zustand

- Offline-first expense tracker with category-wise logging, monthly budgets, visual charts and Gemini AI integration.
